PERSONAL PROJECTS

E-commerce Website

- Developed an e-commerce platform featuring top products from Nike, Puma, and Adidas.
- Built the frontend using HTML, CSS, JavaScript, and utilized Firebase for real-time data management.
- Implemented features such as authentication, cart functionality, and order placement, with a redirect button linking to the official brand websites for product purchases.
- **Deployment Link** : [Shoesphere](#) ↗

Expense Tracker

- Personal Finance Management Web App
- Built using React.js and Tailwind CSS with user authentication and balance management. ...
- Implemented real-time total expense calculation by dynamically aggregating expense data using React state management.
- Implemented features allowing users to input expenses, view balance, and edit the balance at any time.
- **Deployment Link** : [Tracker](#) ↗

Weather App – API-driven UI Dashboard

- Built a clean weather interface using Flask + HTML/CSS
- Integrated OpenWeatherMap API with robust error handling
- Designed responsive UI and weather condition icons
- Deployed using Railway + Gunicorn
- **Deployment Link** : [WeatherApp](#)

SKILLS

MS Word, MS PowerPoint, MS Excel
